Company Overview

Anoto specialise in the design, development and production of digital writing solutions based on our patented camera and dot positioning systems. Anoto digital writing solutions are deployed in high profile public sector institutions such as NHS trusts and national police forces as well as being incorporated into consumer electronics such as high performance tablets from Panasonic. Every Anoto solution is built upon Anoto Live™ Services, incorporating digital pens, print solutions, mobile apps and its supporting cloud infrastructure. Anoto has offices in the UK, China, Japan, Netherlands, Sweden and USA.

Position Overview

Anoto require a Microsoft c#.net & Javascript Front End Developer to join our software team to help develop the next generation of our Pen Platform. The successful applicant will join our Customer Delivery Team both developing the new User Interface for our Pen Platform and delivering solutions for our clients.

This role is, in part, client facing so the successful candidate will be expected to occasionally visit client sites and provide support directly to our clients when required.

Occasional use of SSIS and SSRS may also be required.

The role will be based at Anoto UK's office at Chineham Park in Basingstoke, with easy access by road from the M3 or using the free shuttle bus from Basingstoke railway station.

Applicants should be prepared to present and discuss their commercial experience (where possible) if invited to interview.
